01. Project Overview

Amdox Task Management is a next-generation enterprise productivity platform designed to streamline internal operations for organizations of all sizes. Built with a futuristic dark UI featuring a cyan-accented design language, AMDOX delivers seamless task tracking, real-time collaboration, and comprehensive analytics — all within a single, unified workspace.

Project Name	AMDOX Task Management Platform v3.2
Project Type	UI/UX Design & Web Application Development
Team	Group 3 — Kuruva Siva (Lead), Swaraj Rajendra, Madasu Sai Kiran, Mirra Darshni, Mansi Jadhav
Tech Stack	HTML5, CSS3, JavaScript, Chart.js, Local Storage, QR Generation API
Contact	support@amdox.in | +91 630-282-3022
Institution	St. Johns College of Engineering & Technology, JNTUA University

Mission & Vision

Our Mission

To empower global organizations by delivering seamless, intelligent, and highly secure digital workspaces that redefine work-life efficiency.

Our Vision

To become the world's most trusted platform for enterprise collaboration, setting the standard for innovation in the digital era.

Core Values

- Uncompromising Innovation
- Security by Design
- Radical Collaboration
- Peak Performance

02. Core Features

AMDOX provides a comprehensive suite of enterprise-grade features designed for modern teams.

■ Task Assignment
Assign tasks with clear deadlines and priority levels (High / Medium / Low)

■ Real-Time Synergy
Comment, share files, and collaborate within the platform instantly

■ Deep Analytics
Generate reports on task completion, team velocity, and performance metrics

■ Role-Based Access
Control permissions with Admin, Editor, and Viewer role assignments

■ Deadline Tracking
Receive automated reminders and never miss a project deadline

■ QR Check-In
Contactless attendance via dynamic QR codes, refreshed every 60 seconds

■ Kanban Board
Visualize task flow across To Do, In Progress, Review, and Done columns

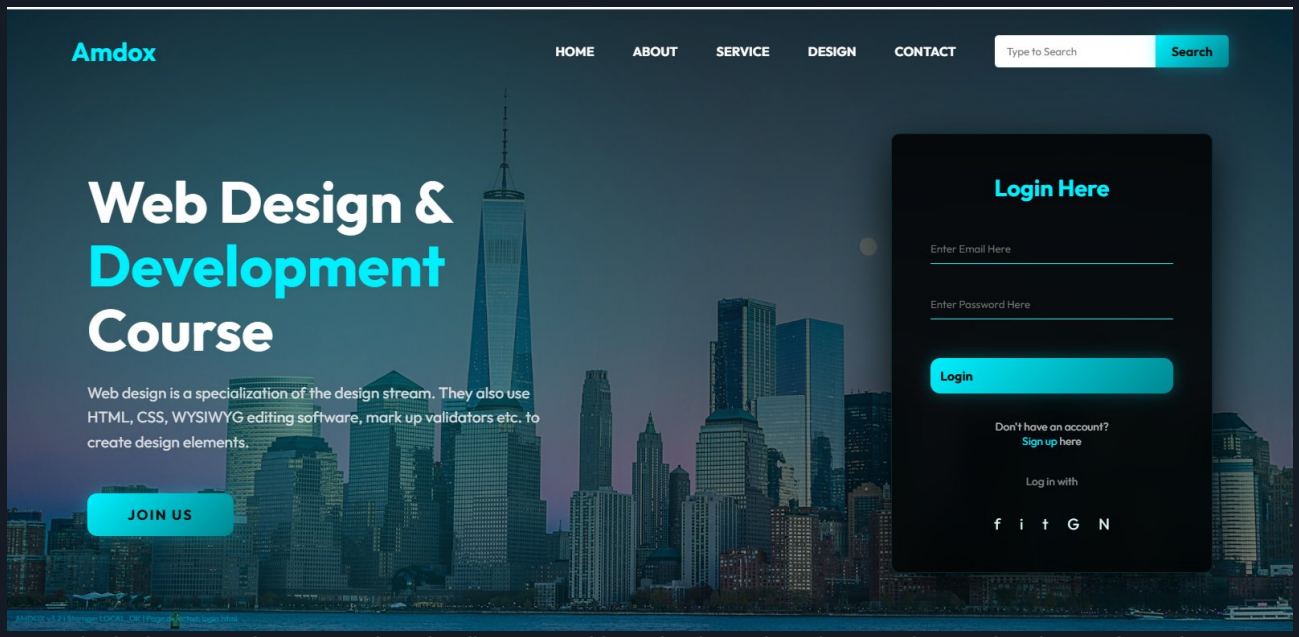
■ Secure Auth
Verified login with role enforcement ensuring platform-wide security

■ Progress Reports
Data-driven decisions with submission flow charts and priority distribution

Global Presence

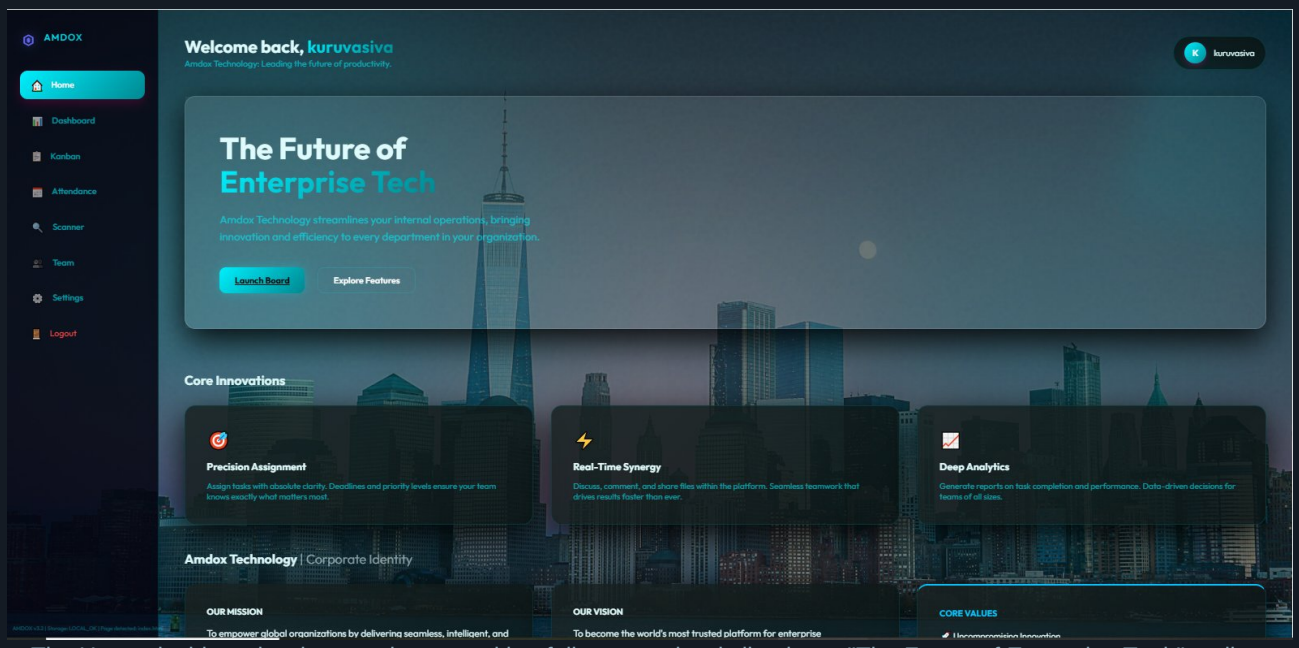
12+	500+	2.5M	94%
Countries	Enterprises	Active Users	Efficiency Rate

03. Login Screen



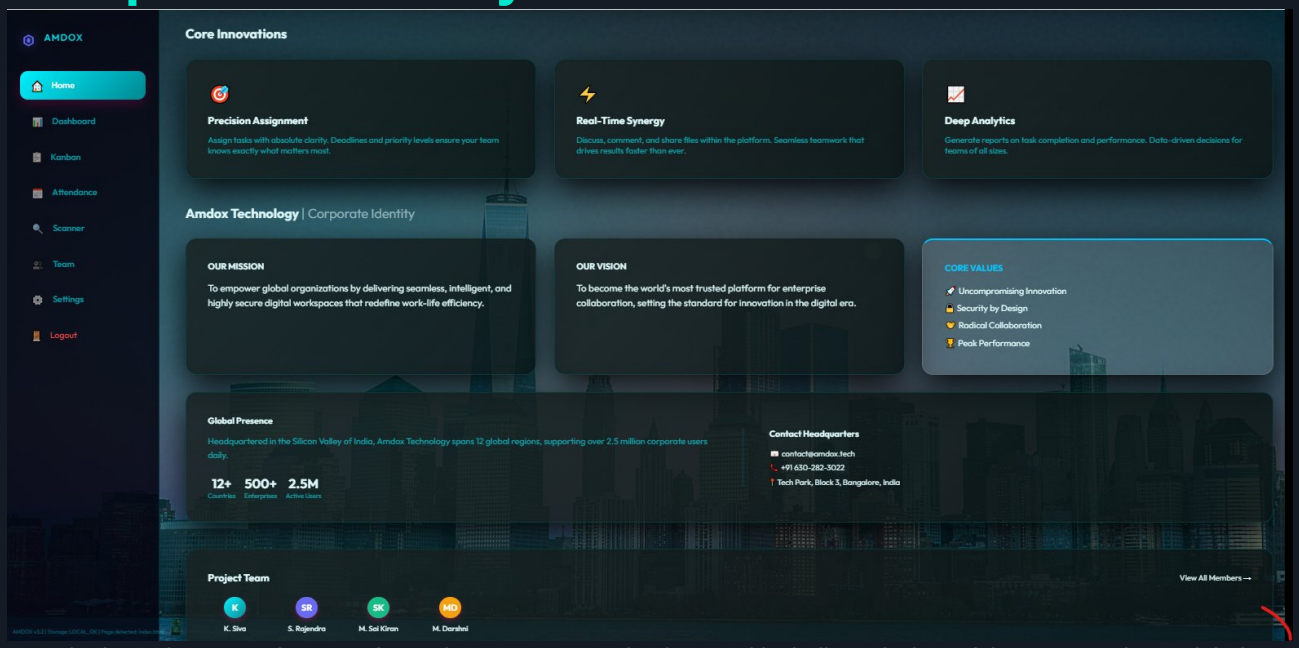
The login screen features a clean landing page with navigation, a hero banner showcasing the "Web Design & Development" identity, and a floating login card with email/password fields, social login options, and a prominent CTA button.

04. Home Screen



The Home dashboard welcomes the user with a full-screen city skyline hero, "The Future of Enterprise Tech" tagline, and quick-access buttons (Launch Board, Explore Features). Core innovation cards — Precision Assignment, Real-Time Synergy, Deep Analytics — are displayed below.

05. Home Screen — Corporate Identity

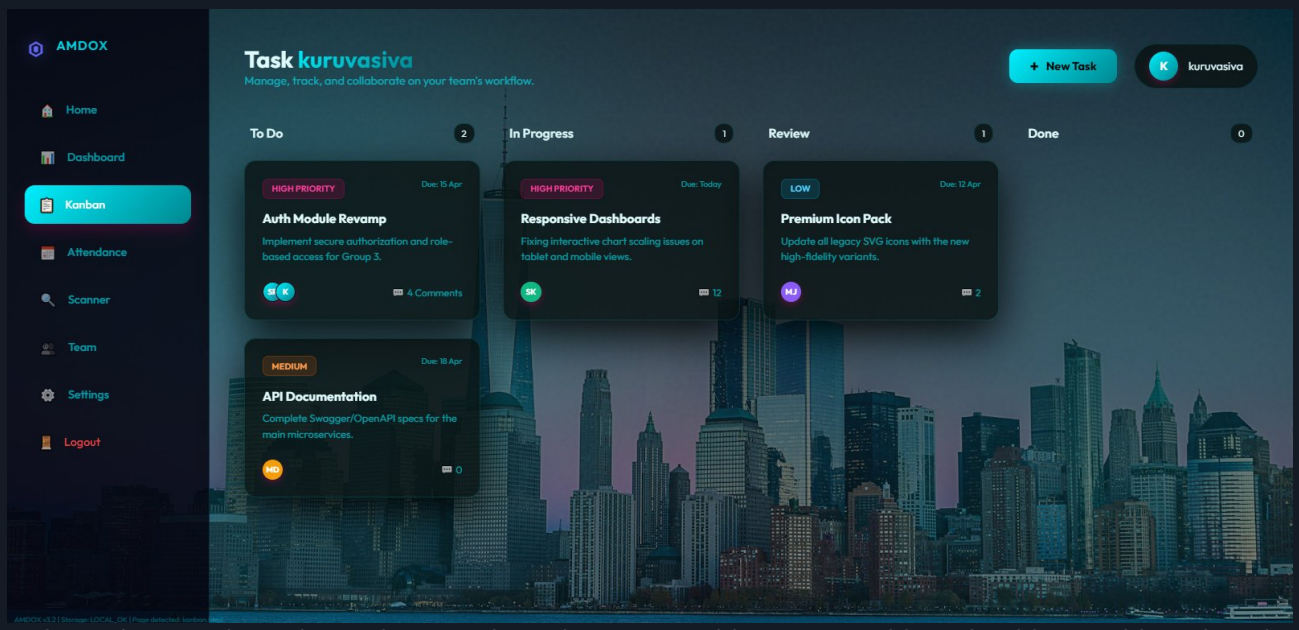


The lower home section reveals Amdox's Corporate Identity panel including Mission, Vision, Core Values, global presence statistics (12+ countries, 500+ enterprises, 2.5M users), headquarters contact, and a quick-view of the project team.

06. Dashboard — Analytics

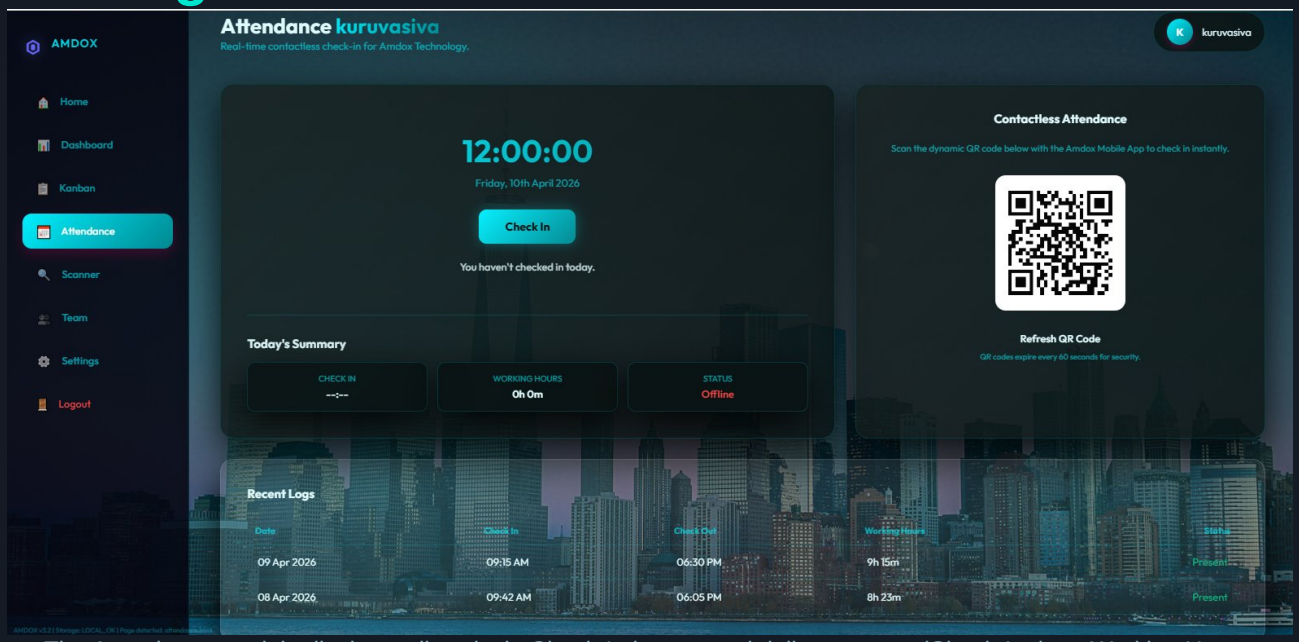
The Dashboard provides real-time performance metrics: 24 Completed Tasks (+12% increase), Team Velocity of 4.8 tasks/day, and 94% Efficiency Rate. A Project Submission Flow chart and Priority Distribution donut chart give visual insight into team output.

07. Kanban Board



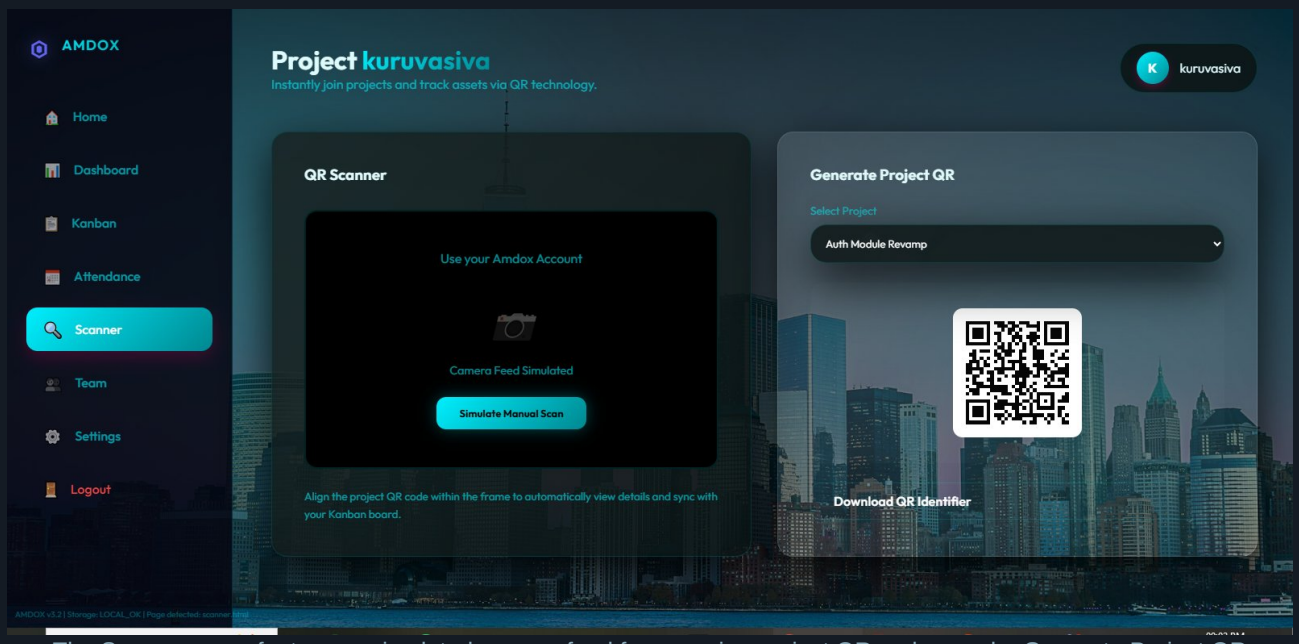
The Kanban Board organizes tasks across four columns: To Do (2), In Progress (1), Review (1), Done (0). Each card shows priority badge, due date, description, assignee avatars, and comment count. A "+ New Task" button enables quick task creation.

08. Attendance Management



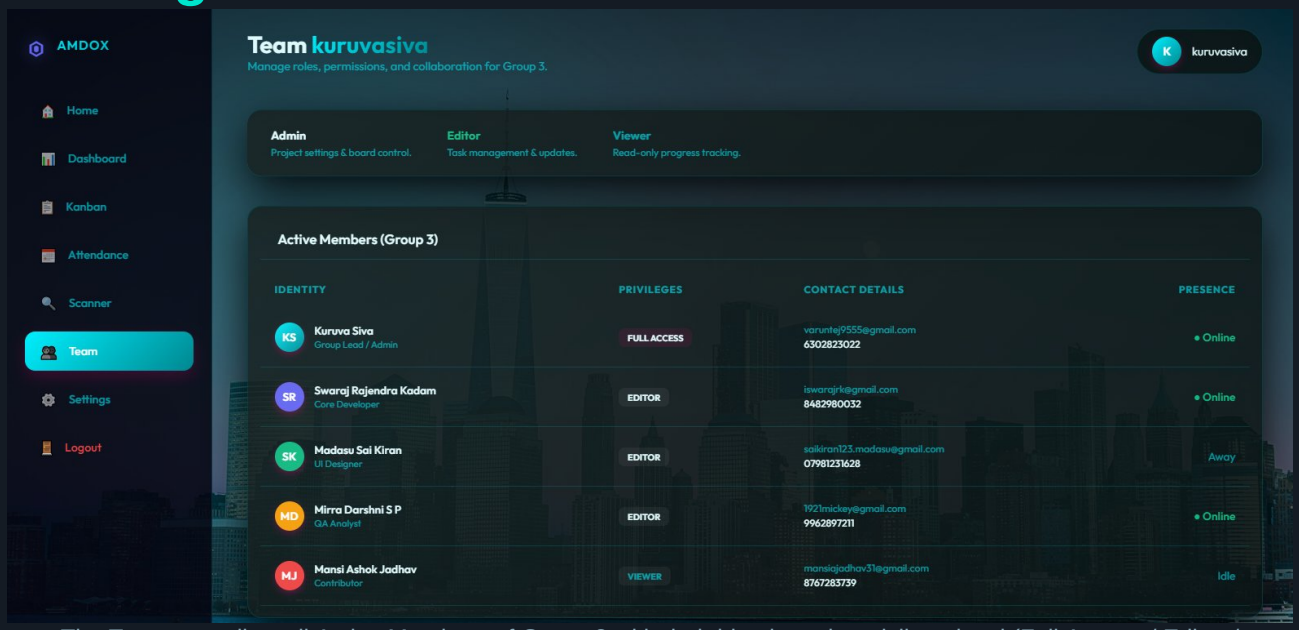
The Attendance module displays a live clock, Check-In button, and daily summary (Check-In time, Working Hours, Status). A dynamic QR code (auto-refreshed every 60 seconds) enables contactless check-in via the Amdox mobile app. Recent attendance logs are shown below.

09. QR Scanner



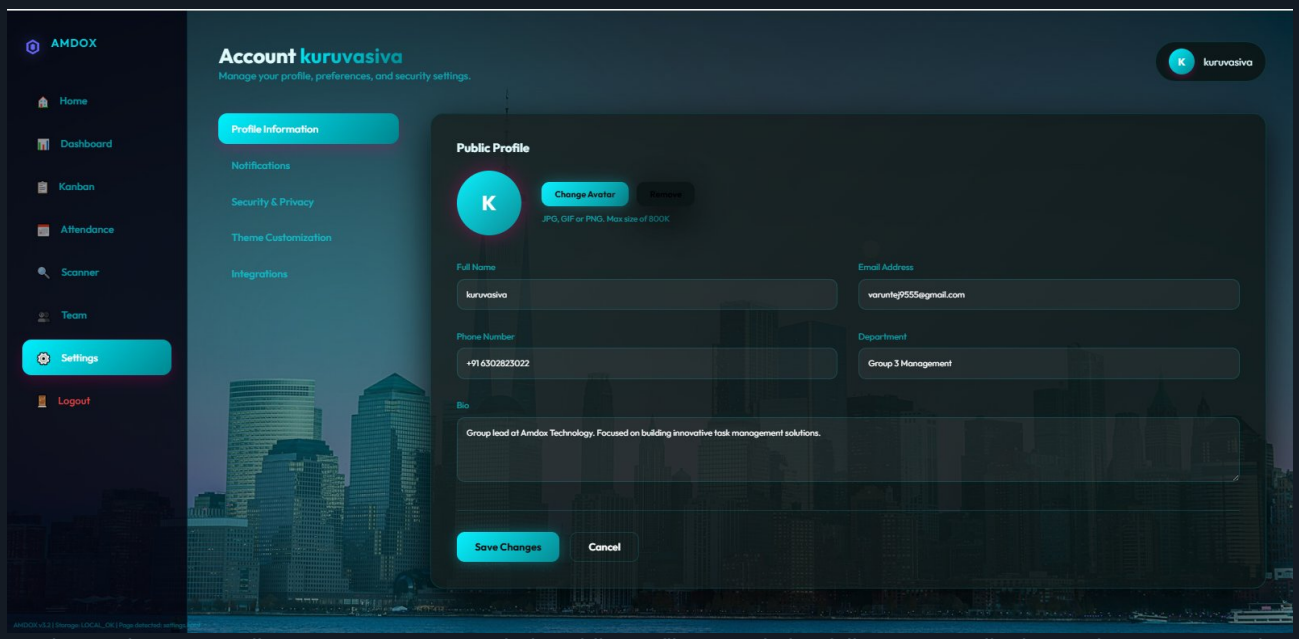
The Scanner page features a simulated camera feed for scanning project QR codes, and a Generate Project QR panel where users select a project (e.g. Auth Module Revamp) to produce a downloadable QR Identifier for instant Kanban board sync.

10. Team Management



The Team page lists all Active Members of Group 3 with their identity, role, privilege level (Full Access / Editor / Viewer), contact details, and real-time presence status (Online / Away / Idle).

11. Settings & Profile



The Settings page allows users to manage their Public Profile — updating full name, email, phone, department, and bio. Sub-sections include Notifications, Security & Privacy, Theme Customization, and Integrations.

12. Team Members — Group 3

AMDOX v3.2 was designed and developed by a dedicated 5-member team at St. Johns College of Engineering & Technology under JNTUA University.

13. Conclusion

AMDOX Task Management v3.2 represents a complete end-to-end UI/UX design solution for modern enterprise teams. Through this project, Group 3 successfully designed and implemented a production-ready web application featuring:

■ Intuitive Navigation 7-section sidebar with contextual active states and smooth transitions	**■ Data Visualization** Live charts (Chart.js) for submission flow and priority distribution	**■ Smart Attendance** QR-based contactless check-in with 60-second refresh security
■ Kanban Workflow Drag-and-drop task management across 4 workflow stages	**■ Role Architecture** Admin / Editor / Viewer permission model with presence indicators	**■ Design Consistency** Unified dark theme with cyan accent, Rajdhani + Inter typography

This project demonstrates our team's capability to deliver enterprise-grade UI/UX solutions that combine aesthetic excellence with functional depth — reflecting the core philosophy of Amdox Technology: building intelligent workspaces that redefine productivity.
